

TOPIC OF THE MONTH **RECYCLING**

***“Don’t throw it
away, it can be
used for something
else”***

***Reuse,
Reduce,
Recycle.***

Awareness to recycling

The children were encouraged to create things from trash such as flowerpots, tissue boxes and purses from plastic bottles.

Our aim was to educate children on how to keep the environment clean through the reduction of waste and by reusing waste materials in order to create everyday useful items.

In order to raise environmental awareness, we held a competition amongst the different classes at the Dzoruwlu A&B Primary School. Each class set out to collect as many water sachets as possible. The class that collected the largest number of sachets won pencil cases made from recycled materials from “Trashy Bags” (Local designer of recycled bags and accessories).

We also stretched the children’s creative ability to the limit by having them use waste to create everyday items such as flowerpots, tissue boxes and purses from plastic bottles.
